

# Low Code Platforms

*Comparison & HCL's POV*

# Degree of Cloudiness

					
Self-service access to provisioning, monitoring and management of platform and applications	Supported 	Not Available	Supported 	Supported 	Supported 
Sharing of resources across tenants	Supported 	Supported 	Supported 	Supported 	Supported 
Tenant Isolation	Supported 	Not Available	Supported 	Not Supported 	Supported 
Bidirectional scaling and auto scaling, versus the minimum unit of scaling	Supported 	Supported 	Not Supported 	Supported 	Supported 
Shielding of users from operational responsibilities (versioning, patching, health and VM management/costs)	Supported 	Supported 	Supported 	Supported 	Supported 

 Adequate – Solution Supports the Capability
  Average – Needs Additional Configuration
  Supports & Extended Features
  Not Supported

# Enterprise Worthiness

					
High Availability	Supported 	Supported 	Supported 	Supported 	Supported 
Disaster Recovery	Supported 	Supported 	Supported 	Supported 	Supported 
High Volume throughput	Supported 	Not Available 	Supported 	Supported 	Supported 
Secure Access	Supported 	Supported 	Supported 	Supported 	Supported 
SLAs	Supported 	Not Available 	Supported 	Supported 	Supported 
Exposure and access to "near and far" (that is, local/in-process and remote/external) application APIs*	Supported 	Supported 	Supported 	Supported 	Supported 
Certification of platform or components	Supported 	Supported 	Supported 	Supported 	Supported 

 Adequate – Solution Supports the Capability  
  Average – Needs Additional Configuration  
  Not Supported  
  Supports & Extended Features

# Functional Completeness

					
Execution of encoded application logic	Not Supported 	Supported 	Supported 	Supported 	Supported 
Access to data in multiple formats	Supported 	Supported 	Supported 	Supported 	Supported 
Multichannel application support	Supported 	Supported 	Supported 	Supported 	Supported 
Composite application support	Supported 	Supported 	Supported 	Supported 	Supported 
Application types (data-centric, dashboards and others)	Supported 	Supported 	Supported 	Supported 	Supported 
IoT Support	Not Supported 	Not Supported 	Supported 	Supported 	Supported 
Extensibility with 3GL	Supported 	Not Available 	Not Supported 	Supported 	Supported 
Life cycle management (DevOps)	Not Supported 	Not Available 	Supported 	Supported 	Supported 
Application management and governance	Supported 	Supported 	Supported 	Supported 	Supported 
Monitoring, management and administration of execution	Supported 	Not Available 	Supported 	Supported 	Supported 
10x Ready	Supported	Supported	Supported	Supported	Supported

 Adequate – Solution Supports the Capability
  Average – Needs Additional Configuration
  Not Supported
  Supports & Extended Features

# Openness

					
Application portability across different infrastructures (including hybrid cloud/non-cloud)	Supported 	Supported 	Supported 	Supported 	Supported 
Support of standards (de facto or de jure)	Supported 	Supported 	Supported 	Supported 	Supported 
Use of open-source components	<b>Not Supported</b> 	Supported 	Supported 	Supported 	Supported 

 Adequate – Solution Supports the Capability  
  Average – Needs Additional Configuration  
  Not Supported  
  Supports & Extended Features

# Service Available

					
Integration support (data and application)*	Supported 	Supported 	Supported 	Supported 	Supported 
Access to SaaS data and features	Supported 	Supported 	Supported 	Supported 	Supported 
Bulk loading and unloading of data	Supported 	Not Supported 	Supported 	Supported 	Supported 
Identity services for authorization	Supported 	Supported 	Supported 	Supported 	Supported 
Development debugging services	Supported 	Not Supported 	Supported 	Supported 	Supported 
Integrated development environments	Supported 	Supported 	Supported 	Supported 	Supported 
Internationalization	Supported 		Supported 	Supported 	Supported 
Log support	Supported 		Supported 	Supported 	Supported 
Deployment domains and SSL certificates	Supported 		Supported 	Supported 	Supported 
API Management	Supported 		Not Supported 	Supported 	Supported 
Subscriber policy for introducing new features	Supported 		Supported 	Supported 	Supported 

 Adequate – Solution Supports the Capability
  Average – Needs Additional Configuration
  Not Supported
  Supports & Extended Features

# High Productivity Development

					
Design Thinking Support	Supported 		Supported 	Supported 	Supported 
Support for Agile & Development Methods	Supported 		Supported 	Supported 	Supported 
Support for test-driven development	Supported 		Supported 	Supported 	Supported 
Support for model-centric UI layer designer	Supported 		Supported 	Supported 	Supported 
Mobile and tablet UI design modelling	Supported 		Supported 	Supported 	Supported 
Business logic or decision modelling support	Supported 		Supported 	Supported 	Supported 
Process or sequence modelling support	Supported 		Supported 	Supported 	Supported 
Data modelling support	Supported 		Supported 	Supported 	Supported 
Assurance of Cloud Features	Supported 		Supported 	Supported 	Supported 
PaaS+ (PaaS with included applications) and prebuilt app libraries	Supported 		Supported 	Supported 	Supported 
One-button application deployment	Supported 		Supported 	Supported 	Supported 

 Adequate – Solution Supports the Capability
  Average – Needs Additional Configuration
  Not Supported
  Supports & Extended Features

# Architecture Versatility & Consistency

					
Integrated high productivity and high control	Supported 		Supported 	Supported 	Supported 
Use of an industry PaaS or container framework	Supported 		Supported 	Supported 	Supported 

 Adequate – Solution Supports the Capability  
  Average – Needs Additional Configuration  
  Not Supported  
  Supports & Extended Features

# Pricing, Community & Support

					
Subscription & Pricing	Supported 	Supported 	Supported 	Supported 	Supported 
Market Presence	Supported 	Supported 	Supported 	Supported 	Supported 
Growth Plan	Supported 	Supported 	Supported 	Supported 	Supported 
Training, Developer Availability & Community Support	Supported 	Supported 	Supported 	Supported 	Supported 
Time to Market					
Relationship with Clifford Chance	Supported 	Supported 	Not Supported 	Not Supported 	Supported
Client Ready	Supported 	Supported 	Not Supported 	Not Supported 	Supported
Credential to deliver new solution					

 Adequate – Solution Supports the Capability
  Average – Needs Additional Configuration
  Not Supported
  Supports & Extended Features

# No Code Platforms – Magic Quadrant

No Code Platforms	Average	Adequate	Excellent	Not Supported
Betty Blocks	32	17	2	5
Salesforce	25	22	5	4
Appian	41	12	0	3
Mendix	12	29	14	1
OutSystems	5	40	11	0
